

# MindArk Monitor

*v1 Keeps an eye on the MindArk Career site, notifying on changes.*

## How it works

### Version 1

Using firefox driver, selenium 3 for python 3, open the job listings site.

Search for the class name, *jobApplication*.

If it exists

    Search for all of class name, *jobTitle*.

    For every match

        Check if already saved.

        If not saved, then save all relevant info on entry

### Version 2

Using **headless driver**, selenium 3 for python 3, open the job listings site.

Search for the class name, *jobApplication*.

If it exists

    Search for all of class name, *jobTitle*.

    For every match

        Check if already saved.

        If not saved, then save all relevant info on entry

**Notify user via email**

## Tech used

- Python 3.5
- Selenium 3 for python
- Headless driver for selenium
- Gmail

## TestData

**Current Site 2017-01-10 : Has no job entries**

**Cached Site 2016 : Has one job entry**
